

ApplyNET Scholarship solves your organization's current and evolving needs for online applications. Without programming skills you can easily design/create application forms, launch them online and export the submitted applications data to your internal database. Different application forms can be designed to differentiate among different groups of applicants. Each application can be divided into different sections – main application, financial application, supplementary materials, etc.

THE KEY BENEFITS OF APPLYNET SCHOLARSHIP:

- Hosted subscriptions start from 125 EUR per month
- No technical knowledge is required to work with the system
- ANS is customizable to the requirements of your organization
- It integrates easily into your current software and database
- A greater scope of applicants is attracted - nationally and internationally
- Large numbers of applications can be received, reviewed, filed and filtered with ease
- ANS provides comprehensive statistics for evaluation of the application process
- The overall cost and time management efficiency of your application procedure is increased

WHAT APPLYNET SCHOLARSHIP OFFERS

COMPREHENSIVE FUNCTIONALITY

ApplyNET Scholarship allows non-technical admissions staff to

- launch their applications online quickly and easily
- set various automatic email notifications
- review and evaluate applications online
- receive and review supporting materials e.g. references, transcripts, essays
- receive application fees via PayPal
- collect and review statistics to evaluate application process performance

SMOOTH INTERFACING WITH EXISTING SOFTWARE

ApplyNET Scholarship interfaces with your database and other software through standard universal interfaces or is accommodated through custom integration. Please contact us for an estimate.

FLEXIBLE LICENSING

An exclusive license allows the installation and use of ApplyNET Scholarship's components on a single server installation within your organization. Additional installations can be easily accommodated by our multi-server license. Alternatively, Eastisoft offers ApplyNET Scholarship as a fully hosted subscription service on an annual or per-use basis.

SHORT TIMELINES

ApplyNET Scholarship easily integrates with any kind of in-house admissions and contacts management data base software. The standard implementation time is approximately 10 working days.

WHAT ELSE EASTISOFT OFFERS

TRAINING

Online training sessions cover all pertinent aspects of the system, including functionality of online applications, user roles, etc. On-site training available by request.

READY -TO-USE SETUP

The system comes complete with a full set of application forms that are already customized to your particular requirements, including separate application forms for regular applicants and/or special applicant groups. ApplyNET Scholarship thus lets you start processing student applications right away.

SUPPORT

Eastisoft offers a full selection of support services, including additional support and maintenance services, development of added functionality, implementation of new modules, changing/adding/deleting fields in the current applications, design of new applications, etc.

PRICELIST

LICENSED IN-HOUSE OPTION requires that the user has an Internet server and purchases the ApplyNET Scholarship license from EASTISOFT. The minimum needed web server configuration includes Windows 2000 server license, a powerful computer, and Internet connection.

HOSTED SUBSCRIPTION – This option allows you to use all the functions and features of ApplyNET Scholarship without all the hassle of running it in-house, since Eastisoft takes care of all the support and hosting. This gives you great usage rights, yet spares the hosting expenditures for you.

	LICENSED IN-HOUSE			HOSTED SUBSCRIPTION		
	EUR	USD	GBP	EUR	USD	GBP
ApplyNET Scholarship – Monthly Maintenance Fee (20 hrs prepaid)**	35	45	25	-	-	-
